White Plains, NY

EDUCATION

University of Connecticut

Bachelor of Science in Computer Science
Bachelor of Science in Electrical Engineering
GPA: 3.93/4.00

Storrs, CT
May 2027
May 2027

Awards/Scholarships: STEM Academic Excellence Scholarship, Honors Program, Dean's List (Fall 2023 - Spring 2025)

PROFESSIONAL EXPERIENCE

Husky Quantitative Group

Software Engineer

Storrs, CT

August 2025 - Present

- Co-founded UConn's first student run quantitative finance group and streamlined recruiting to ensure longevity
- Developing open source software, including a dashboard using React + AWS to integrate portfolio management, backtesting, and algorithm development to increase research velocity
- Creating product roadmaps and system design diagrams to guide developer efforts and track progress

Hillside Ventures STEM Fund

Analyst

Storrs, CT

August 2025 - December 2025

- Connected with 100+ SaaS startups and conducted extensive due diligence, resulting in a board approved investment
- Scraped LinkedIn data to create a detailed database of alumni for future analysts to expand their network

Mediaocean

Software Engineering Intern

New York City, NY

June 2025 - August 2025

- Automated ticket assignment with an LLM-based workflow, reducing manual triage by filtering hundreds of tickets and optimizing workload distribution according to team members' roles and capacities
- Developed, tested, and deployed 8 client-side features in a React.js project management tool to streamline workflows for 50+ software engineering teams, empowering team-leads to efficiently plan sprints and evaluate progress
- Enhanced the user experience with consistent, fast, and accurate results, while ensuring data privacy with encryption

Innovation Shop, University of Connecticut

Shop Assistant

Storrs, CT

September 2024 - May 2025

- Assisted 100+ students by providing guidance to ensure effective use of equipment and adherence to safety protocols
- Minimized downtime by performing regular maintenance and repairs for 3-D printers, laser cutters, and other tools

PROJECT EXPERIENCE

Stock Buddy

Responsive Web Application (Personal Project)

White Plains, NY

August 2024

- Developed and published an interactive dashboard to track and visualize the performance of stocks in real-time
- Leveraged asynchronous API calls to cut apparent loading time and retrieve updated stock news and prices
- Tech Stack: React JS, Tailwind CSS, JavaScript, GitHub Pages, Figma, API's

AI Assisted Air Traffic Control

Python Application (HackUConn 2024 Finalist Project)

Storrs, CT

March 2024

- Spearheaded a team of 4 peers as lead developer to design and prototype an AI-driven Air Traffic Control System that converts and transcribes audio, minimizing auditory miscommunication and serving as a redundant safety measure
- Awarded 2nd place during the 20hr hackathon, competing against 100+ participants and earning a \$1000 prize

SKILLS

Software/Programs: Git, Jira, MATLAB, LTspice, Autodesk Inventor, Solidworks, Figma, Microsoft Office, G-Suite

Programming Languages: Python, JavaScript, React JS, SQL, C, C++, R, HTML, CSS, Haskell

ORGANIZATIONS

UConn IEEE (Executive Board), STEM Scholars, UConn Husky Quantitative Group, Hillside Ventures
